

## ► Machinery Directive incorporating CE marking

### Objective

Find out all you need to know about the Machinery Directive 2006/42/EC and your requirements with regard to CE marking of machines. Which machines fall under the scope of the Machinery Directive? What are the responsibilities of machine builders and machine operators (employers)? This course provides the answers. The course also covers the corresponding standards, which refer to the design, construction and maintenance of machines placed on the market and operated within the European Economic Area. The course provides a step-by-step illustration of what needs to be considered in the CE marking process.

### Contents

- Scope and requirements of the Machinery Directive 2006/42/EC
- Essential health and safety requirements
- Harmonised standards under the Machinery Directive 2006/42/EC
- European legislation related to machinery
- The process and procedures for CE marking of machinery
- Responsibilities in the machinery life cycle
- Administration and documentation requirements, such as Declarations of Conformity, Technical Construction File (TCF) and the CE plate

### Target groups

- Design engineering managers
- Design engineers
- Safety officers and specialists involved in workplace evaluation
- Production manager or person responsible for production
- Maintenance staff
- Those responsible for upgrades and maintenance of plant and machinery
- Examiners
- Technical purchasers
